

Gale Directory of Databases

Now online on *Gale Directory Library*

NOW AVAILABLE *Gale Directory of Databases* is a one-stop source for information on databases, database products, online services and database vendors and distributors. The most comprehensive resource of its kind, *Gale Directory of Databases* is an essential reference for information professionals, librarians and researchers seeking authoritative information on electronic publishing and products. Covering more than 20,000 databases and related products in all subject areas worldwide (in English as well as other languages), *Gale Directory of Databases*

provides detailed, up-to-date information on publicly available products accessible through an online vendor or batch processor, or available for direct lease, license or purchase. Multiple editions are available by standing order, ensuring access to the most up-to-date information as well as historical data.

Database listings include content and subject coverage; type; language; time span; update frequency; geographic coverage; producer contact information; and vendor availability. Producer and vendor entries feature full contact information, including address, phone, fax, Web site URL and e-mail addresses; former names; branch office locations; and a list of available databases and products. For online vendors (or hosts), entries cover conditions of access, networks used and gateway access. For portable vendors, entries include a list of distributors.

Real-world users might include:

- Business analysts can quickly locate databases that include information on Australian companies and industries
- Business researchers can locate online services that include the Who Owns Whom database
- Information professionals can quickly identify the third-party distributors or the producer name and contact information for particular databases
- Librarians can easily identify which database products are available as WILSONDISC products
- And many others

ABOUT GALE DIRECTORY LIBRARY

With *Gale Directory Library*, researchers can use state-of-the-art functionality to perform a range of data sorting, filtering and exporting. These innovative features, unlike anything seen previously from our directories, make *Gale Directory Library* the essential tool for research.

- Find contacts — Finding a company, person, publication (or other kind of entity) is easy. Basic search lets users quickly look up names, search by keyword, and browse the full text of your directory holdings.
- Generate lists, analyze trends — Export search results and use them in programs like Excel or Word, making the creation of mailing lists a snap.
- Cross-searchable — Search across our growing number of directory titles. Each directory can be searched individually by its own unique data fields, or search the entire directory collection.

Additional benefits of *Gale Directory Library*:

- Use it like a database; buy and own it like a book collection
- State-of-the-art search, sort and export features
- Available 24/7 from any Internet-connected computer
- Choose the directory titles you want, and own the data
- Print, e-mail or download individual entries
- Entries include hot-linked Web sites and e-mail addresses (when available)
- Export results to analyze data or generate mailing lists
- Includes more data than print version, when appropriate
- Marked items lists let you select entries to generate custom results
- Available backfiles provide historical data
- Growing list of available directories
